

PGP[®] ULTRA ROTARY SPRINKLER

This Upgrade of the Trusted PGP is Packed with New Features

The PGP Ultra takes the foundation of the original best-selling PGP rotor and raises the bar with a range of powerful new features developed over three decades of research, customer feedback, and lab testing. Upgrades include a non-strippable drive and automatic arc return that allow the turret to be turned without causing damage, and return the turret to its original arc regardless of where it is turned.

Other advanced features include 34 nozzle options with several radius choices, and a headed and slotted setscrew. The flexibility of the PGP Ultra gives system installers an array of efficient options on any site. For peak efficiency, choose the PGP-04 with an optional pressure-regulated body that reduces incoming pressures of up to 100 PSI to 45 PSI, for water savings up to 25%.

PGP ULTRA ROTORS PROVIDE

Unmatched Reliability

Why Choose PGP Ultra?

- Pop-up sprinkler rotates silently and disappears when the job is done
- Waters evenly and efficiently
- Offers precise pattern control with no wasteful backslash onto walkways or buildings
- Whisper-quiet rotation, without impact or clatter
- Patented non-strippable, vandal-proof drive mechanism allows the turret to be turned without causing damage
- The most reliable rotor on the market, the PGP Ultra now has a 5-year warranty

Key Benefits

- Automatic arc return: Returns to the original arc regardless of where the turret is turned
- Patented non-reversing 360° for part- and full-circle in one model, from 50° to 360°
- Includes an easy-to-install, square top rack of 8 standard nozzles
- Optional racks of short-range nozzles for smaller areas are also available
- Available in shrub, 4", 6", and 12" pop-up
