## **Pro48 TechTool Multi-function Irrigation Tester**

**Manufacturer:** Armada Technologies

**Contact:** Eric Dixon

**Phone:** +1 616-803-1080

**Fax:** +1 616-803-1083

**Web:** [www.armadatech.com](http://www.armadatech.com)

**Product Name:** Pro48 TechTool Multifunction Irrigation System Tester

**Manufacturer Part Number:** Pro48

**Category:** Test Equipment

**Product Function:** Tests electrical function of irrigation controllers, field wire and valves. Helps locate and identify valves and associated wiring.

**Weight:** Less than 1 pound.

**Packaging:** 4-Color Clamshell

**Keywords:** Armada TechTool Solenoid Valve Activator Chatter Irrigation Tester

**Shipping Restrictions:** None

**Warranty:** 12 Months

**Clamshell Contents:** Pro48 Tester, User Guide.

### Text for Product Information screens.

#### Major Bullets:

- Simple LED Indicators for Good, Short, Open, Volts
- Chatters Solenoids.
- Activates and Holds Solenoids Open.
- Generates 1 kHz Tracing Tone.
- Checks Clock 24 V Power Output.
- Tests for Open or Shorted Wiring.
- Slim test clips grip screws on terminal strips.
- Uses two (2) 9-volt Batteries (not included).

The Pro48 TechTool Solenoid and Clock Checker is a low cost electrical function tester for irrigation contractors and maintenance personnel. The Pro48 TechTool can be used to perform a series of simple procedures to test, verify, and identify solenoid, wire, and clock problems. Solenoids can be checked using either activation or chatter modes. Lost or buried solenoids are quickly found as well by listening for the chatter. Wiring can be verified and tagged with the built in tone generator. Clocks also are tested for proper 24 V output with the simple LED power check.

Housed in a thick-walled plastic case, the highly visible yellow Pro48 TechTool is designed for rugged use in the field.

Available accessories include the Pro210F Inductive probe for tone tracing and the Pro22 carrying case. Both of these are standard with the model Pro48K kit.
