## **Pro48K Multifunction Irrigation Test Kit**

Manufacturer: Armada Technologies

Contact: Eric Dixon

Phone: +1 616-803-1080

Fax: +1 616-803-1083

Web: [www.armadatech.com](http://www.armadatech.com)

Product Name: **Pro48K Multifunction Irrigation Test Kit**

Manufacturer Part Number: **Pro48K**

Category: **Test Equipment**

Product Function: **Tests electrical function of irrigation controllers, wiring and valves. Helps locate and identify valves and associated wiring.**

Weight: **Less than 2 pounds.**

Packaging: **4-Color Clamshell**

Keywords: **“Armada” “Pro48” “Solenoid Valve Activator” “Chatter” “Irrigation Tester” “Toner”**

Shipping Restrictions: **None**

Warranty: **12 Months from purchase date**

Clamshell Contents: **Pro48 Tester, Pro210F Probe, Pro22 Case, User Guide.**

### Text for Product Information screens and Literature.

#### Major Bullets:

- Activates and Holds Valve Solenoids Open.
- Chatters Solenoids.
- Generates and Tracks Wire Tracing Tone.
- Tone probe has bright LED headlight for visibility in dark spaces.
- Checks Clock 24 VAC Power Output.
- Tests for Open or Shorted Field Wiring.
- Pro48 tester uses two (2) 9-volt batteries,  
Pro210F Probe uses four (4) 'AA' batteries (not included).

The Pro48K Multifunction Irrigation Test Kit is a low cost troubleshooting test kit for irrigation contractors and maintenance personnel. The Pro48K kit can be used to perform a series of procedures to test, verify, and identify solenoid, wire, and clock problems. Solenoids can be checked using either activation or chatter modes. Lost or buried solenoids are quickly found as well by listening for the chatter. Wiring can be verified and tagged with the built in tone generator function and the filtered, headlight-equipped tracing probe. Clocks also are tested for proper 24v operation with an LED voltage check.

Housed in durable, thick-walled plastic cases, the highly visible yellow Pro48 tester and the Pro210F tracing probe are designed for rugged use in the field.
