

Pro900 Digital Cable Locator

Manufacturer: Armada Technologies LLC

Contact: Eric Dixon

Phone: 616-803-1080

Fax: 616-803-1083

Web: www.armadatech.com

Product Name: **Pro900 Digital Cable Locator**

Manufacturer Part Number: **Pro900**

Category: **Test Equipment, Underground Cable Locators, Wire and Valve Locator**

Weight: **10 pounds with Case**

Keywords: **Armada Technologies Underground Pipe Wire Cable Locator**

Shipping Restrictions: **None**

Warranty: **12 Months**

Box Contents: **Pro900R Receiver, Pro900T Transmitter, IC2 Inductive Clamp, GS1 Ground Stake, ProH3 Stereo Headset, Pro900CS Cordset, ProCH4 AC Adapter, User Guide.**

Text for Product Information screens and Literature.

Major Bullets:

- Digital Interference Suppression
- AC Wall Outlet or Battery Powered
- Two Direct Connection Frequencies (2 kHz, 33 kHz)

PRODUCT INFORMATION SHEET

Pro900

- Wireless Inductive Antenna or Clamp Modes
- Passive 50/60Hz AC Tracking
- Selectable Null or Peak Tracking Modes
- Selectable Solid or Beeping Tracking Tone
- Non-contact Inductive Clamp and Inductive Antenna Included.
- Audible (Speaker or Stereo Headset) or Visual Bar Graph
- Low Battery Digital Bar Graph
- Auto Off

The Pro900 Digital Underground Cable Locator is a full featured digital underground locator for contractors and maintenance personnel. Incorporating three different locating frequencies, the Pro900 tracks metallic cabling, including CATV, electrical, telephone, sprinkler, and lighting. The Pro900 transmits solid or intermittent signals that are easy to follow. The digital signal reception allows for crystal clear tone reception in most situations with either null or peak reception.

The Pro900 incorporates a 50/60Hz passive locating mode, which identifies electrical sources (power cables) and tracks them without using a transmitter of any kind. Contractors can identify the path of 50/60 Hz underground cables without disconnecting them or connecting to them.
