

Quality Turf & Ornamental Products

Quinclorac 75 DF

Post-Emergent Herbicide

Dependable post-emergent control of both broadleaf and grassy weeds in a wide variety of turf species from residential and commercial to golf courses, sports fields and sod farms.

- Long-lasting control of weeds and grasses - from one month up to 90 days
- Excellent control of crabgrass, even in its mature stages
- Eliminates a broad spectrum of broadleaf and grassy weeds without harming turf
- Application and seeding flexibility - ideal for seeding and overseeding before or after application

Formulation 75% a.i. dry flowable

Active Ingredient Quinclorac

Competitive Brand BASF Drive®

Packaging 6 x 1 lb (30 cases/pallet)

Application Rates See label for specific uses and rates

Mode of Action Absorbed by roots and foliage, active ingredient translocates to interfere with plant growth and cellulose production, which quickly causes plants to die

Signal Word Caution
