

Rust Stain Preventer 2X Concentrated

Prevents irrigation rust stains.

Rid O' Rust is the superior, cost-effective rust preventer for use in American Hydro feeder systems. It neutralizes iron in well water to prevent ugly rust stains on your property, extends the life of your sprinkler components and prevents costly maintenance calls. Rid O' Rust is safe for people, pets and plants when used as directed.

Rid O' Rust Preventer 2X replaces the existing 500 & 2000 product line and is over 3X stronger than the competition. Our new simplified line of concentrates provides easier start-ups, reduced packaging and freight costs.
