

Walk-Behind Sprayers

SnowEx® push sprayers are completely battery powered with the ability to spray brine through the spot spraying wand or front boomless nozzle. That means you can make quick work of some of the toughest applications, like stairs and sidewalks.

Features

Rechargeable Battery

Sprayers are powered by a 12-volt electric pump, rated at 2 gallons per minute at 60 psi, which includes a rechargeable battery that fully charges in 12 to 16 hours.

Adjustable-Height Boomless Nozzle

The boomless nozzle can be height adjusted and sprays up to 48 inches wide.

Spray Wand

With the unit's heavy-duty spray wand, you can easily apply brine to some of the toughest spots to reach...including stairs.

Extra-Wide Vented Cap

An easily accessible, extra-wide vented cap allows for quick filling.

All SnowEx Liquid Ice Control Systems are designed to handle the following materials:

- Salt Brine
- Calcium Chloride Brine
- Premium Branded Liquids

VSS-1000 Sprayer

The VSS-1000 is designed for applying liquid to sidewalks, pedestrian walkways, stairs, curbs and other confined areas.

3-Position Nozzles

With triple-stream, single-stream and wide-fan settings, the three-position nozzles allow you to adjust the application for the condition.

Hand Spray Wand

A spray wand allows spot spraying applications in tough locations, like stairs.

Rotary Broom

The SnowEx® SS-4000 is not your standard rotary broom. This combination sweeper/snowplow is loaded with user-friendly features, including a centrally driven broom that can work against curbs, walls and other obstacles from either the right or left side.

SS-4000
40" Wide

Features

Adjustable Brush Speed

The unit's multifunction controls allow variable brush speed adjustment.

Variable Brush Down Pressure

Down pressure can be increased or decreased by raising or lowering a pneumatic support wheel.

360-Degree Turning

A freewheel feature and pneumatic support wheel offer 360° turning for maximum maneuverability.

Adjustable Brush Angle

A floating pivotal broom head has five angle settings to adjust the trajectory of snow.
