

RAKES - BOW

SUPERIOR STRENGTH: WELDED AND RIVETED

Our Kenyon S550 Irrigation™ (42604 & 42600) and Seymour S400 Jobsite™ bow rakes (42316 & 42314) are heavy-duty and long lasting tools. The head-to-handle connection features a unique tapered steel plug that is press fit into the powder-coated aluminum handle and then drilled and riveted all the way through. The bow rakes also feature a steel bow that is moved closer to the edge of the head, providing greater lateral stability, and is welded on both the front and back sides of the head for greater strength.
