

Walk-Behind Spreaders

For tight applications like sidewalks and driveways, we offer a range of walk-behind broadcast and drop spreaders designed specifically for snow and ice management.

SP-65*	SP-85/SP-85SS*	SD-95/SD-95SS*
100 lb	160 lb	160 lb

Features

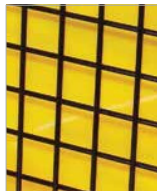

Single-Slot Port Design (SP-65, SP-85 and SP-85SS)

The single-slot port design enhances material flow from the hopper.

Sidewalk Deflector (Standard on SP-85 and SP-85SS, optional on SP-65)

Adjustable sidewalk deflectors limit the spread pattern to keep material on the intended path.

Top Screen

A standard top screen prevents large chunks of material from entering the hopper.

Pinpoint Material Delivery (SD-95 and SD-95SS)

SnowEX® drop spreaders lay salt in a 28-inch-wide path, ensuring material is placed exactly where you want it.

» Powder-Coated Frame (SP-65, SP-85 and SD-95)

» Stainless Steel Frame (SP-85SS and SD-95SS)

» Poly Construction

» Poly Cover

Salt Boxes

Beyond the equipment you need to spread salt and sand, we offer equipment to store it. Our line of economy and heavy-duty salt boxes provide a simple, effective way to keep de-icing materials out of the elements. And our rugged salt scoop makes easy work of moving materials from the box to the hopper of your walk-behind spreader.

Heavy-Duty Salt Box

SB-550	SB-1100	SB-1800
5.5 cu ft	11.0 cu ft	18.0 cu ft

Economy Salt Box

SB-500	SB-1000
5.0 cu ft	10.0 cu ft

Salt Scoop (SP-05)

Rotary Broom

The SnowEX® SS-4000 is not your standard rotary broom. This combination sweeper/snowplow is loaded with user-friendly features, including a centrally driven broom that can work against curbs, walls and other obstacles from either the right or left side.

SS-4000
40" Wide

Features

Adjustable Brush Speed

The unit's multifunction controls allow variable brush speed adjustment.

Variable Brush Down Pressure

Down pressure can be increased or decreased by raising or lowering a pneumatic support wheel.

360-Degree Turning

A free-wheel feature and pneumatic support wheel offer 360° turning for maximum maneuverability.

Adjustable Brush Angle

A floating pivotal broom head has five angle settings to adjust the trajectory of snow.

Multiple Drive Gears

Drive system has three forward gears plus reverse.

Optional debris collector box for post-season cleanup applications (DCB-040)

» Standard With Easy-On/Easy-Off Blade Attachment

» HONDA® Engine

» 7-Position Handlebar Height Adjustment

» Large, 16-Inch Diameter Bristles

» Polar Trec Tires
