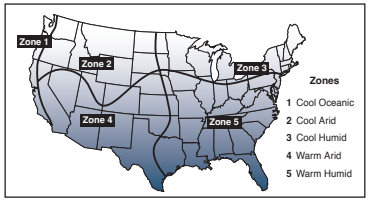
GENERAL INFORMATION

Triactiv is a unique formulation built on the foundation of TriCure soil surfactant and enhanced with a rich source of carbon for microbial stimulation and a multifunctional biostimulant to alleviate abiotic turfgrass stress.

DIRECTIONS FOR USE

Applications should begin in early spring, before the first signs of heat-related stress appear. It can also be applied curatively on existing dry areas and localized dry spots. Immediate watering-in is not necessary, as Triactiv is not phytotoxic. For best results, water into the soil within 24 hours of application to the depth of the rootzone.



Site Location	Oz. / 1000 ft² 2 Gal. Water	Usage
Zone 1–3	4 oz. / Monthly	Regular use for normal conditions
	6 oz. / Monthly	High stress conditions and curative for LDS
Zone 4–5	6 oz. / Monthly	Regular use for normal conditions
	8 oz. / Monthly	High stress conditions and curative for LDS

TANK MIXING

Triactiv has shown to be safe when combined with most fertilizers and soil amendments. Field testing should be done on a small area before spraying to ensure safety concerns are met. Triactiv may increase the rate of absorption of other products into the leaf when applied together.

PRECAUTIONARY STATEMENTS

- Contact with the eyes can cause irritation, excessive watering, and redness.
- Overexposure to skin may cause itching and redness.
- Harmful if swallowed. May cause diarrhea, nausea and vomiting.
- Wear approved eye protection and clothing. Keep out of reach of children.

IN CASE OF CONTACT

- **EYES:** If eye exposure occurs, wash with water for at least 15 minutes. Call a physician.
- **SKIN:** Eye and skin irritant. Wash skin and clothing thoroughly with water after exposure.
- **INGESTION:** Contact physician or poison-control center. If victim is conscious and able to swallow, quickly give milk or water to dilute. Do not give sodium bicarbonate, vinegar, or fruit juices. Never give anything by mouth if victim is unconscious or having convulsions. Induce vomiting only upon advice of a physician.

STORAGE AND DISPOSAL

Protect product from freezing. If freeze occurs, allow product to warm / thaw before use. Store in an approved facility out of reach of children or unauthorized personnel. Store in original container. Dispose of unused contents according to RCRA and all applicable national and local government regulations. Containers may be disposed of after thorough rinsing and offered for recycling or reconditioning or disposed of according to approved national and local regulations. Do not reuse empty containers.
