

# Tribute<sup>®</sup> TOTAL

**Active Ingredients:** foramsulfuron, thienencarbazone-methyl, halosulfuron

**Formulation:** water dispersible granule

**WSSA Group:** 2

**Signal Word:** caution

## Best Uses

- Selective, post-emergent herbicide for broad-spectrum control of weeds growing in well-established bermudagrass and zoysiagrass
- Controls annual and perennial grassy weeds, sedges, kyllinga and 55 types of broadleaf weeds
- Transition aid for the removal of cool-season grasses from bermudagrass

## Attributes Of Tribute<sup>®</sup> Total

- Control of wide variety of hard-to-control weeds in one product
- Weed growth is inhibited within hours after application, yet visible symptoms typically require one or more weeks before becoming evident
- The weed is usually fully controlled within 1-4 weeks after treatment
- The speed of symptom development will be faster at warmer temperatures

## Key Strengths

- Eliminates the need for multiple products
- Control of hard-to-control weeds like dallisgrass, Virginia buttonweed and doveweed

goosegrass

dollarweed

## How To Apply

Tribute Total can be used as a broadcast application or as a spot treatment.

### Broadcast Applications

- Mix a minimum of 10 gallons of water per acre
- Use a spray adjuvant to achieve effective weed control

### Spot Treatments

- Efficient for controlling individual weeds and/or small areas of weeds
- To make a spot treatment, mix 0.023 – 0.073 oz. of Tribute Total per gallon of water and add spray adjuvant
- Spray weeds until wet
- Spot treatments may cause temporary yellowing and growth regulation effects on the turfgrass
- For spot treatments, treat no more than 10,000 sq. ft. per acre
