

HUNTER WIND-CLIK

WIND SENSOR

The wind sensor shall be capable of interrupting the power from the irrigation controller to the valves when wind speed exceeds a set rate. The sensor can be set to actuate at various wind speeds from a minimum of 12 miles per hour (19.3 kilometers per hour) to a maximum of 35 miles per hour (56.3 kilometers per hour). The sensor shall also have an adjustable reset for wind speeds of between 8 and 24 miles per hour (12.8 to 38.6 kilometers per hour).

The wind sensor circuitry shall be housed in a corrosion resistant PVC casing. The switch shall be rated at 24 VAC, 5 amps.

The sensor shall have an integral, mounting adapter that allows installation on 2" PVC pipe or 1/2" conduit.

The sensor shall be installed in accordance with the manufacturer's published instructions. The sensor shall carry a conditional five-year exchange warranty. The wind sensor shall be the Wind-Clik series as manufactured by Hunter Industries Incorporated, San Marcos, California.
